Selection of Project Management consulting firm for Preparation, Monitoring, Supervision & Surveillance of Rural Water Supply Scheme Executed under Jal Jeevan Mission (JJM) at village/ block/district in the State of Maharashtra for Nashik Region

Background

A) About Jal Jeevan Mission:

Water is a basic necessity. Lack of assured availability of potable water adversely impacts households and local communities. In the absence of access to potable drinking water at home, families, especially women and young girls are forced to spend lots of time and energy every day in carrying water to their homes. During scarcity, State Governments/ local administrations take emergency measures to provide water through tankers, trains, etc. With the Government taking a number of steps to improve 'ease of living', people now expect tap water supply in their homes.

In this backdrop, Jal Jeevan Mission (JJM) has been launched in partnership with States, to enable every household in villages to have Functional Household Tap Connection (FHTC) in the next 5 years. It is envisaged that with FHTC, each household will have potable water supply in adequate quantity of prescribed quality on regular and long-term basis. To implement the mission, institutional arrangements at various levels have been made and State's PHE/ RWS Departments are to play a critical role. They have to help Gram Panchayat and/ or its subcommittee to plan, implement, manage, operate and maintain its in-village water supply systems. A sense of ownership has to be installed in the village community as they are at the center of this mission.

Wherever potable water is not available in adequate quantity, PHE/ RWS Departments have to plan water transfer, its treatment and distribution system. While planning water supply system, operation and maintenance is the most critical aspect. It is important that water supply schemes function throughout their complete design period. To ensure that public investments do not go to waste, there is a need to strengthen water sources especially in water-stressed areas. In water quality-affected villages, technological innovations have to be explored. PHE/ RWS Departments have to prepare District and Village Action Plans with the active participation of village community. Following the 'bottom up approach', States are to prepare Annual Action Plan as well as five-year 'State Action Plan' with deliverables and timelines; and implement the programme in mission-mode.

B) State level- State Water and Sanitation Mission (SWSM):

The concept of State Water and Sanitation Mission (SWSM) started in 1999 for coordination, convergence and policy guidance at the State level, headed by Chief Secretary of the State.
